

KX-TG7873

Link2Cell Bluetooth®/3 Handsets

Features

- Sync smartphone to home phone, no landline required
- Link up to two smartphones to make and receive cell calls with Link2Cell handsets
- Clearly hear calls from noisy places with Noise Reduction
- Never miss a text with talking ID alerts from Link2Cell handsets
- Keep your smartphone charged with convenient USB input

Features

Link2Cell

Link2Cell is a cordless phone system that operates together with your cell phone. Simply charge your cell phone through the USB port on the Panasonic base unit and synch the two via Bluetooth. Now you're ready to make and receive cell calls that are automatically routed through all your home phone handsets. Which means there's no need to carry your cell phone around your home.

USB Charge

No convenient electrical outlet for charging your cell phone or smart phone? No problem. The base unit features a convenient USB charging port. And because it's Link2Cell, you can answer your cell phone calls on your Panasonic home phone handsets without draining your cell phone battery.

Text Message (SMS) Alert

Never miss a text message again. The Text Message Alert feature notifies you of received text message on your cell phone through an alert on your cordless handset when your cell phone is synced to the base unit.

Enhanced Noise Reduction

Enhanced Noise Reduction (available on select 2013 models) not only suppresses background noise but also enhances your voice at the same time. Which means the next time your teenager calls you from a concert, you'll actually be able to hear him.

DECT 6.0 Plus Technology

If you're looking for superb sound quality and long range, look no further than the DECT 6.0 Plus technology in Panasonic cordless phones. Thanks to error correction up to 80x, you get clear transmission even with extended range. Engineered to work in 1.9GHz frequency, our DECT 6.0 Plus phones won't interfere with wireless devices such as routers, wireless keyboards and microwave ovens. Whether you use them in the basement or the backyard, our phones truly go the distance.

Answering Machine with Message Forwarding

Thanks to advanced answering machine functions (available on select 2013 models), you can get messages wherever, whenever. At home, the base unit will beep to alert you to a message. And on the road, the phone will send a message to your registered cell or work phone.

Talking Caller ID

Hear who's calling from across the room. The Talking Caller ID feature uses text-to-speech technology, announcing the caller's information in between rings.

Intelligent Eco Mode

With the Intelligent Eco Mode, when you use the handset closest to the base unit, you'll automatically lower power consumption. This not only extends available talk time but also prolongs battery life. Which means less frequent charging and in the end, fewer batteries in landfills.

Additional Features:

- Dial Keypad on Base
- Large, 1.8" White Backlit Handset Display
- Tone Equalizer
- Call Block
- Silent Mode
- Ringer ID
- Key Detector compatible
