

## **Cordless Phones - Everyday Living: KX-TG8162ALB**

### **Features**

**Cordless phone twin-pack with customised call blocking, a premium full-colour screen and a black-out operation feature**

Home communications have never been more simple or reliable. The KX-TG8162 is incredibly easy to use and unique technology means that even when the power fails, this cordless phone won't. You'll also love customising your phone, so that you only receive the calls you really want to answer.

### **Peace of mind when you need it most**

Cordless phones have become a popular household communication tool. Most people don't realise until it's too late that their cordless phone must have power to communicate with the handset. Not being able to make calls during a black-out isn't just inconvenient; it could be the difference between life and death during a real crisis. The KX-TG8162 incorporates a clever Power Failure Talk System; during a black-out you can supply the power stored in your handset to the base unit, so you can make calls even when the power is out.

## **Premium high resolution TFT LCD**

The 1.8 inch full colour display provides high contrast and a wider view angle in style. This technology is unique to Panasonic cordless phones, making the KX-TG8162 the most affordable full colour screen cordless phone in the market.

## **Smart features provide the ultimate convenience**

By utilising the smart top key, Incoming Call Block and Night Mode, you can control calls so they don't intrude on your life, yet still be available for the really important people. Turn the phone onto silent and then simply use the flashing top key to know when the phone is ringing or if a new message has been stored. Alternatively, the Incoming Call Block and Night Mode functions allow you to customise your phone so that it only rings when certain people call. This is fantastic for when you are sleeping and don't want to be disturbed, yet still need to receive calls from close friends or family.

## **Advanced audio features for amazingly clear calls**

You can rely on the KX-TG8162's outstanding audio quality, even when you are far away from the base unit. Enjoy conversations in the backyard or the garage, thanks to a high-precision error correction system that ensures clear conversations with less voice interruptions. This remarkable phone also features a customised sound mode, allowing you to adjust the pitch of phone voices; meaning users of all ages can talk comfortably and be easily heard.

## **All the extras you expect from Panasonic**

The KX-TG8162 features the unique One Touch Eco Mode to greatly reduce signal output and power consumption, along with a high-quality digital answering machine and a phone book with enough space to store 200 names and numbers.
