

## **Panasonic KX-TG6591: Big button & hearing aid compatible DECT phone**

Sporting large buttons for easy dialling, and an extra-loud ringer, the Panasonic KX-TG6591 cordless phone is designed with accessibility and convenience in mind. With a premium design and a clearly illuminated display and keypad, the system also provides excellent hands-free functionality and an integrated answer machine along with a range of other value-adding features.

### **User-Friendly Answering Machine**

The Panasonic KX-TG6591 features a sophisticated digital answering machine with a high enough capacity to store 40 minutes of voice messages. You can listen to your messages by using either the controls on the base station or those on the cordless handset. You can also configure the answering machine to record phone calls in progress rather than only take messages while you're away from home. The answering machine also supports a remote playback mode, allowing you to listen to your messages from any external phone.

### **Convenient Hands-Free Calling**

Emphasising Panasonic's focus on reliability, comfort and ease of use, the Panasonic KX-TG6591 sports hands-free calling. The handset is equipped with a quality speakerphone, allowing others to join in with your conversation, but for those times when you want to enjoy hands-free phone calls in private, you can connect any standard headset to the 2.5mm port provided. A belt clip is also supplied for the handset for maximum portability.

### **Why Should You Buy this Cordless Phone?**

Designed to be as accessible as possible, the Panasonic KX-TG6591 is best suited to the elderly and hard of hearing thanks to its louder ringer and compatibility with hearing aids.
